# 1. Introduction

---

A Public Participation Plan (PPP) dated March 2022 and last updated in September 2022, was prepared for the proposed Dom-Mar Recycling and Transfer Facility in accordance with CP-29 and the Tips for Preparing a Public Participation Plan Pursuant to the New York State Department of Environmental Conservation Commissioner Policy-29, Environmental Justice and Permitting Issued December 4, 2003, and Revised February 1, 2006. Implementation of the PPP began in October 2022, the public comment period for the PPP ended on November 18, 2022. After the close of the comment period, an Interim Progress Report, including a Summary of Comments shall be drafted and submitted to the NYSDEC and Secondary Stakeholders, including the Lead Agency (Town of Wawayanda). The following Interim Progress Report presents the status of the PPP implementation, and includes documentation of the following items:

- Public Information Meeting Notification.
- Public Information Meetings.
- Summary of Comments:
  - A list of all substantive concerns/issues raised to date.
  - All resolved and outstanding issues.
  - A determination as to whether the volume of comments warrants either additional posting of information or an additional public information meeting.
  - A detailed description of how the issues will be addressed within the Application Documents.
- Components of the PPP yet to be implemented.
- Expected timeline for completion of the PPP.

## **2. Status of PPP Implementation**

---

### **2.1 Meeting Notification**

A Meeting Notification and a Project Fact Sheet were mailed to each Primary and Secondary Stakeholder identified in the PPP. A copy of the Meeting Notification and Project Fact Sheet is included in Attachment 1. The Stakeholder mailing list is included in Attachment 2. The community was notified through a public notice posted in printed and digital versions of The Times Herald-Record. The Meeting Notification and Project Fact Sheet was also posted on public bulletin and message boards identified in the PPP. An email address and mail address for Stakeholders to directly submit comments or questions was included on the Meeting Notification and Project Fact Sheet. Notification was given at least three weeks before the first scheduled meeting date. The Times Herald-Record public notification and select photos of public bulletin and message board postings are included in Attachment 3.

### **2.2 Public Repository**

A public repository containing physical copies of the proposed Facility Application Documents was set up at the Middletown Thrall Library at 11-19 Depot Street, Middletown, NY. A dedicated website containing electronic copies of the proposed Facility Application Documents was also set up. The website URL and the Library address were included on the Meeting Notification and Project Fact Sheet. An index of the items included in the Public Repository is included in Attachment 4.

### **2.3 Public Information Meetings**

Two public information meetings were held, Meeting #1 occurred on November 1, 2022, at 6:00 PM, and Meeting #2 occurred on November 7, 2022, at 1:00 PM. The meetings were held virtually through Zoom and managed by Tele Town Hall, LLC of Arlington, VA. The Meeting Notifications included a URL and a call-in number available to participate via phone. The meetings included an introduction describing the instructions for commenting, a presentation discussing the permit process, the status of the applications, a description of the Facility and its operations, and the environmental evaluations completed, and a public comment period. The second meeting was conducted over the phone. The meeting presentation slides are included in Attachment 5. A list of the participants for each meeting is included in Attachment 6.

### **2.4 Components yet to be implemented**

This Interim Progress Report shall first be submitted to the NYSDEC for review. Following approval from the NYSDEC, the Interim Progress Report including the Summary of Comments shall be submitted directly to the secondary Stakeholders including the Town of Wawayanda. The Secondary Stakeholders are identified on the Stakeholder mailing list is included in Attachment 2. All of the PPP documents will become part of the Application and will be made available to the public at the Project Document Repository.

Upon completion of the PPP, a Final Progress Report with written certification that the applicant has complied with the PPP shall be submitted to the NYSDEC. As part of the certification, the Progress Report shall be updated to detail any activity which occurred subsequent to the Interim Progress Report. The certification shall be signed by the Project Applicant/Sponsor and submitted to NYSDEC prior to a final decision on the Application. The certification will become part of the Application and will be made available to the public at the Project Repository.

## 3. Summary of Comments

---

### 3.1 Substantive Comments Received to Date

The comments received to date from the PPP implementation have been in favor of the proposed project and include the following types:

- Support for the project based on limited capacity at the local waste transfer facilities which are congested, the additional capacity of the proposed Facility will ease wait and travel times.
- Support for Marangi Waste, a local family business that keeps their collection truck fleet well maintained and clean.
- Support for the project based on increased local material recovery and recycling capability.

A list of the Comments received is included in Attachment 7.

It is noted prior to the PPP Public Information Meetings, the Town of Wawayanda Planning Board held two public hearings for the Dolsontown Corridor Draft Generic Environmental Impact Statement (GEIS) on June 8, 2022, and July 13, 2022. Public comments regarding the GEIS were accepted until July 25, 2022. The Dom-Mar Recycling and Transfer Facility as well as other proposed projects along Dolsontown Road were included in the GEIS to evaluate the cumulative impacts on traffic, water and sewer, stormwater, wetlands, threatened and endangered species, and cultural resources. Responses to the comments were included in the Final GEIS submitted by Whiteman Osterman & Hanna LLP, of Albany NY on November 4, 2022.

### 3.2 Resolved and Outstanding issues

There are no resolved or outstanding issues.

### 3.3 Additional Posting of Information

No additional posting of information, or public meetings are anticipated at this time except for the Interim Progress Report, and Final Progress Report as discussed in Section 2.4.

### 3.4 Application Document Changes

No application document changes are proposed based on the PPP comments received. It is noted that the application documents have been significantly updated based on feedback from the New York State Department of Environmental Conservation and the Town of Wawayanda prior to the Public Information Meetings.

## ***4. Timeline of Completion***

---

The following timeline of completion for the Dom-Mar Recycling and Transfer Facility PPP is anticipated:

- Submittal of Interim Progress Report – November 2022
- NYSDEC acceptance of the Interim Progress Report – December 2022
- Submittal of the Interim Progress Report to the Secondary Stakeholders and addition to the Public Repository – December 2022
- Submittal of Final Progress Report with written certification and addition to the Public Repository – January 2023

## ***Meeting Notification and Fact Sheet***

## **PUBLIC INFORMATION MEETINGS**

Marangi Waste Management of Middletown, NY is hosting public information meetings to solicit comments and feedback from the community for the proposed Dom-Mar Transfer and Recycling Facility on Dolsontown Road, in the Town of Wawayanda, NY. The proposed Facility consists of a Transfer and Recycling building, with an associated administrative office building, inbound and outbound truck scales, residential drop-off area, parking for employees and trailers, wastewater collection and treatment system, and a stormwater management system. The proposed Facility is included in the Dolsontown Corridor Generic Environmental Impact Statement being administered by the Town of Wawayanda Planning Board. The proposed operations will require a solid waste permit (also known as "Part 360" permit) from the New York State Department of Environmental Conservation (NYSDEC). The meetings are required by the NYSDEC for compliance with Commissioner's Policy CP-29, Environmental Justice and Permitting.

The meetings will be held virtually via Zoom, information for each meeting is listed below:

### **Meeting No. 1**

**Tuesday, November 1, 2022 at 6:00 pm**

<https://w.teletownhall.us/hrdJiZ>

or Call: (540)-409-4375 Ext.86716#

### **Meeting No. 2**

**Monday, November 7, 2022 at 1:00 pm**

<https://w.teletownhall.us/T7gzSU>

or Call (540)-409-4375 Ext.86717#

The public is encouraged to attend either meeting to receive a briefing on the proposed project, to ask questions about the project and to provide comments. Your input will receive consideration in the permitting process and will influence, in a positive manner, how the project is implemented. Questions and comments can be provided in writing or in person at either public information meeting. If you cannot attend the meeting or would prefer to send your comments directly, you are encouraged to send written comments to:

Marangicomments@ensolinc.com

or

EnSol, Inc.

661 Main Street

Niagara Falls, NY 14301

Attention: David Lenox

or:

**Comments will be accepted until November 18, 2022.**

Application Documents may be viewed at the Thrall Middletown Thrall Library at 11-19 Depot Street Middletown, NY 10940. Project information may also be viewed online at:  
<https://DomMarTransferStation.ensolinc.com>.

# FACT SHEET

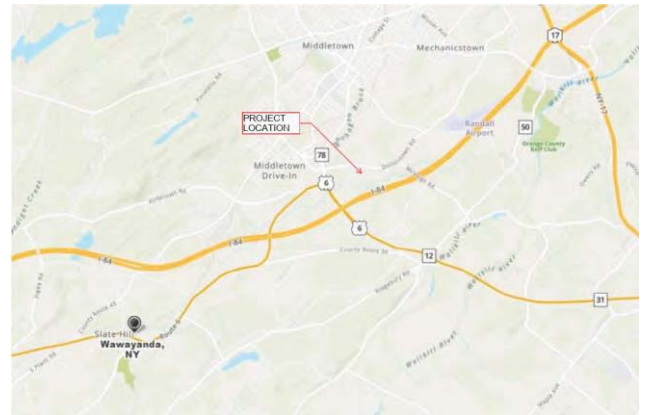

## DOM-MAR RECYCLING AND TRANSFER FACILITY DOLSONTOWN ROAD, WAWAYANDA, NY

### OVERVIEW

The Applicant, DOM KAM, LLC, is seeking to construct and operate the Dom-Mar Recycling and Transfer Facility on Dolsontown Road, in the Town of Wawayanda, NY. A permit is required from the New York State Department of Environmental Conservation (NYSDEC). The NYSDEC is currently reviewing the permit application. The proposed Facility is included in the Dolsontown Corridor Generic Environmental Impact Statement being administered by the Town of Wawayanda Planning Board.

### FACILITY OVERVIEW AND OPERATIONS

The proposed Facility consists of a Recycling and Transfer building, with an associated administrative office building, inbound and outbound truck scales, residential drop-off area, parking for employees and trailers, wastewater collection and pre-treatment, and a stormwater management system. A future second phase of development may include a maintenance building, fabrication shop, fueling station, roll-off container storage, and employee parking for the associated collection truck fleet.

Once operational, the facility will accept up to 950 tons per day (tpd) of material comprising household, commercial and institutional waste and recyclable materials generated in and around the area. The facility will not accept hazardous materials of any kind. All transfer, sorting, and recycling activities shall take place within an enclosed building, mitigating noise and odor effects. Operation of the Facility will include implementing best management practices for dust, sediment, and erosion control, daily tipping floor cleaning, and daily inspections to detect any litter, dust, odor, or vectors.

### Recycling Operations

The Facility shall include recycling activities to help meet current local and State recycling objectives, with the flexibility to support future recycling initiatives. The Facility recycling activities shall include:

- Recovery of:
  - Cardboard,
  - Concrete,
  - Asphalt,
  - Rock,
  - Brick,
  - Soil,
  - Brush,
  - Unadulterated wood,
  - Incidental tires, and
  - Metals.
- Baling and transfer of cardboard.
- Palletizing, wrapping, and transfer of product stewardship/electronic products.
- Shredding and transfer of unadulterated wood for further processing.
- Transfer of source separated recyclables and organics.

### Trucks and Traffic

Recyclable and waste and materials will be delivered to the facility in approximately 80 trucks each day. Outbound material will be shipped in transfer trailers; approximately 44 each day. The facility will contribute an average of 12 trucks per hour to existing traffic on Dolsontown Road. The Facility proposes to operate during the expanded hours of 4:00 am to 7:00 pm to distribute traffic flow as evenly as possible and avoid peak traffic times.

### Wastewater Collection and Treatment

Wastewater generated at the Facility will be primarily derived from precipitation gathered on trailers, incidental liquid contained within materials received, and floor wash water. Pollutants of concern include total suspended solids, biochemical oxygen demand, oil, and grease. Wastewater within the Transfer and Recycling building shall drain to floor drains connected to double contained drainpipes which will convey the wastewater to a gravity oil-water separator for pre-treatment. The gravity oil-water separator shall separate oil and grease and allow solids to settle from the wastewater.

The floor drains within the Transfer and Recycling Building shall also trap solids by setting the drainpipe inverts one foot above the base of the floor drain. The pre-treated wastewater shall then be discharged to a grinder pump and pumped via a force main to the existing sewer line along Dolsontown Road.

### Stormwater

Runoff from the site shall be collected by swales and catch basins and conveyed to treatment features including a Bioretention basin and two Wet Ponds designed in accordance with the New York State Stormwater Management Design Manual. The stormwater collection system shall be monitored in accordance with the NYSDEC Multi-Sector General Permit for stormwater discharges from industrial facilities.

### Litter

All loaded trucks and containers will be covered to prevent litter. The facility grounds will be inspected for litter at the end of each day. Any litter that is found will be collected and disposed.

### Odors and Dust

Material handling will take place inside the building, reducing the potential for dusty conditions at the Site. Odors and dust shall be controlled by cleaning indoor material handling areas on a daily basis. Odor neutralizers and deodorizers including barrel misters will be used if needed to control any short-term problems. Facility doors shall be kept closed except when vehicles are entering or exiting buildings. If odor issues continue to persist an air purification system shall be installed.

Dusty conditions in traffic areas are not anticipated due to limited onsite travel and low speeds. Exhaust odors from heavy equipment and trucks will be minimized by limiting idling engines in accordance with current regulatory idling restrictions. Burning of materials is not permitted at the Facility. Mechanical street sweeping equipment or misting equipment shall be used as a contingency if dusty conditions persist.

### Noise

Noise levels at the Facility will conform to the NYSDEC Part 360 requirements and the Town of Wawayanda Code as detailed in the Engineering Report. Most of the site equipment will be operated within the building. Internal combustion engine equipment used at the Facility will be equipped with mufflers. Waste Facility operations equipment will typically not be operated before 4:00 a.m. or after 7:00 p.m.

### **FACILITY OVERSIGHT**

- The Facility shall be required to adhere to the conditions of its Solid Waste Facility permit. The NYSDEC will conduct regular inspections of the facility.

### **FACILITY BENEFITS**

- Reduces the amount of materials disposed in local landfills.
- Increases the amount of local waste materials that are recycled.
- Approximately 30 employees will be needed to staff the Facility.
- Reduces area traffic and exhaust emissions by consolidating waste into larger trucks, thereby reducing the number of smaller vehicles traveling directly to landfills.

## **ABOUT MARANGI WASTE MANAGEMENT**

Marangi Waste Management is a family-owned company started in 1955 and based in Middletown, New York. The family members and employees operate a well-maintained collection truck fleet which services Orange and Rockland Counties. The company is an industry leader in its service area and strives to adapt and grow with the changes in the waste management field.

## **PROJECT DOCUMENT REPOSITORIES**

Members of the public are encouraged to review all facility design and NYSDEC application materials to gain a better understanding of the proposed facility. These materials will be made available for review at the following locations:

Middletown Thrall Library, 11-19 Depot Street, Middletown NY, (845) 341-5454

The documents will be available until four months after the NYSDEC's final permit decision date.

A dedicated website, containing electronic copies of the same information, will also be set up at:

<https://DomMarTransferStation.ensolinc.com>

PUBLIC INFORMATION MEETING  
for the  
DOM-MAR RECYCLING AND TRANSFER FACILITY

---

November 1, 2022

1

## AGENDA

---

- Introduction
- Applications/Permits
- Project Status
- Project Description
- Operations
- Environmental Review
- Public Comment Period

2

## INTRODUCTION

---

- DOM KAM, LLC (Marangi Waste Management) of Middletown, NY is proposing to construct and operate the Dom-Mar Recycling and Transfer Facility on Dolsontown Road, in the Town of Wawyanda, NY.
- Consists of a Recycling and Transfer building, with an associated administrative office building, inbound and outbound truck scales, residential drop-off area, parking for employees and trailers, wastewater collection and treatment system, and a stormwater management system.
- Future site development may include a Truck Maintenance Facility.
- Project Engineer is EnSol, Inc.
- The applicant is a family-owned company started in 1955 and based in Middletown, New York. The family members and employees operate a well-maintained collection truck fleet which services Orange and Rockland Counties. The company is an industry leader in its service area and strives to adapt and grow with the changes in the waste management field.

3

## APPLICATIONS/PERMITS

---

- Town of Wawayanda Site Plan Approval and Special Use Permit.
- State Environmental Quality Review (SEQR).
- New York State Department of Environmental Conservation (NYSDEC) Solid Waste Management Facility Permit.
- State Pollution Discharge Elimination System (SPDES) General Permit for Stormwater Discharges from Construction Activity.
- SPDES Multi-Sector General Permit for Stormwater Discharges Associated with Industrial Activity during operation of the Facility.

4

## PROJECT STATUS

---

### **Town of Wawayanda Site Plan and Special Use Permit:**

- Site Plan and Special Use Application submitted and is currently under review, including SEQR documents.
- Project is included in the Dolstontown Road General Environmental Impact Statement (GEIS) being administered by the Town Planning Board. The GEIS evaluates the cumulative environmental impacts of the various proposed projects along Dolsontown Road including traffic, stormwater, water, sewer, cultural resources, wetlands, and threatened and endangered species.
- Public Hearing for GEIS closed on July 27, 2022.
- Dolosontown Road Final GEIS with responses to public comments submitted to the Town on November 4, 2022.

5

## PROJECT STATUS

---

### **NYSDEC Solid Waste Management Permit:**

- Application has been submitted and is currently under review.
- Site is located in a NYSDEC Potential Environmental Justice Area (PEJA).
- PEJAs include areas with minority or low-income communities that may bear a disproportionate share of the negative environmental consequences resulting from industrial, municipal, and commercial operations.
- The proposed Facility's Solid Waste Management Facility Permit application is subject to Commissioner Policy 29 (CP-29) which provides guidance for incorporating environmental justice concerns into the NYSDEC environmental permit review process and the application of the State Environmental Quality Review (SEQR) Act.
- CP-29 requires applicants within a PEJA to actively seek public participation during the application review process through a Public Participation Plan.

6

# PROJECT STATUS

## NYSDEC Solid Waste Management Permit:

- Public Comments shall be documented, and substantive comments addressed in the Final Public Participation Plan.

The Final Public Participation Plan shall include:

- A list of all substantive concerns/issues raised to date.
- All resolved and outstanding issues.
- A determination as to whether the volume of comments warrants additional posting of information.
- A detailed description of how the issues will be addressed within the Application Documents.

7

# PROJECT LOCATION

(1118 Dolsontown Road)

8

## PROJECT LOCATION

(Potential Environmental Justice Areas)

9

## FACILITY DESCRIPTION

The proposed Facility consists of the following:

- A Recycling and Transfer building.
- Administrative office building.
- Inbound and outbound truck scales.
- Residential drop-off area.
- Parking for employees and trailers.
- Wastewater collection and pre-treatment.
- Stormwater management system.
- A future second phase of development may include a maintenance building, fabrication shop, fueling station, roll-off container storage, and employee parking for the associated collection truck fleet.

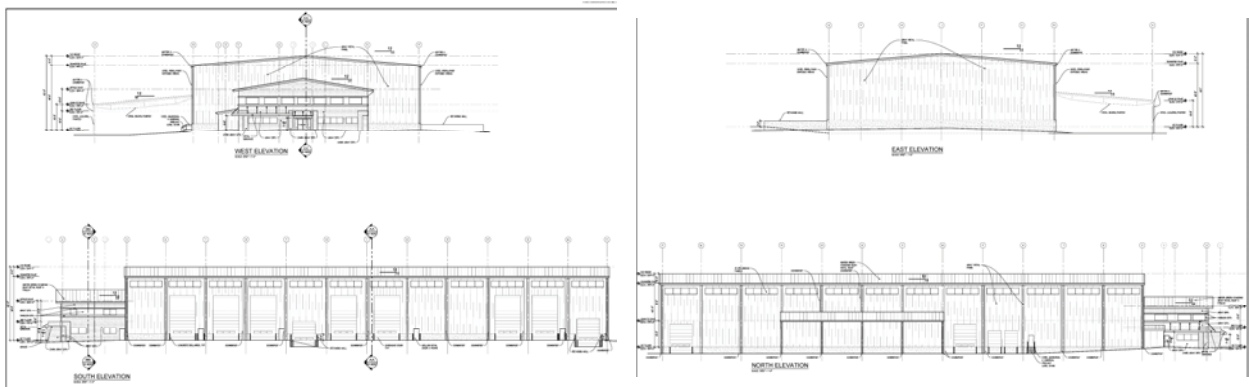

10

## SITE PLAN

11

## BUILDING ELEVATIONS

12

## FACILITY DESCRIPTION

---

- Recover and Process Recyclables and Transfer remaining material for Disposal
- Material Types: MSW, C&D, Industrial (No Hazardous, Radioactive, or Sludge per NYSDEC)
- Tonnage: 950 Tons Per Day
- Employees: Facility: 10, Corporate Office: 20
- Equipment: Loader, Trailers/Yard Horse, Excavators with Grapples, Truck Scales
- All Storage and Processing Operations Indoors (Non-contaminated concrete, asphalt, rock, brick, and soil can be stored outdoors).

13

## RECYCLING

---

The Facility shall include recycling activities to help meet current local and State recycling objectives, with the flexibility to support future recycling initiatives. Recycling activities shall include:

- Recovery of:
  - Cardboard
  - Concrete
  - Asphalt
  - Rock
  - Brick
  - Soil
  - Brush
  - Unadulterated Wood
  - Incidental Tires
  - Metals
- Baling and transfer of cardboard.
- Palletizing, wrapping, and transfer of product stewardship/electronic products.
- Shredding and transfer of unadulterated wood for further processing.
- Transfer of source separated recyclables and organics.

14

### RECYCLING FLOOR PLAN

15

### RECOVERY AND TRANSFER FLOOR PLAN

16

## OPERATIONS

---

### **Trucks/Traffic**

- Materials will be delivered to the facility in approximately 80 trucks each day. Outbound material will be shipped in transfer trailers; approximately 44 each day.
- Traffic study considering current and future traffic on Dolsontown Road from various projects proposed is being finalized as part of the Dolsontown Road GEIS.
- Proposed Operating Hours – 4:00 AM to 7:00 PM Monday-Friday, 7:00 AM to 2:00 PM Sat to minimize traffic impacts and avoid peak traffic times.
- 35 Off Street Parking Spaces (Employee Driven)
- 6 Transfer Trailer parking spaces.

17

## OPERATIONS

---

### **Odor Control**

- All material handling, processing, and storage will take place inside the enclosed building.
- Facility doors shall be kept closed except when vehicles are entering or exiting the building.
- Odors shall be controlled by cleaning indoor material handling areas daily.
- Burning of materials will not be permitted.
- Odor neutralizers and deodorizers including barrel misters will be used if needed to control any short-term problems.
- If odor issues continue to persist an air purification system shall be installed as a contingency.

18

## OPERATIONS

---

### Dust and Litter Control

- Dusty conditions in traffic areas are not anticipated due to limited onsite travel and low speeds.
- Exhaust odors from heavy equipment and trucks will be minimized by limiting idling engines in accordance with current regulatory idling restrictions.
- Mechanical street sweeping equipment or misting equipment shall be used as a contingency if dusty conditions persist.
- All loaded trucks and containers will be covered to prevent litter. The facility grounds will be inspected for litter at the end of each day. Any litter that is found will be collected and disposed.
- Litter fencing shall be placed downwind of the Facility to prevent fugitive litter.

19

## OPERATIONS

---

### Wastewater

- Wastewater shall primarily consist of precipitation gathered on trailers, incidental liquid contained within the materials received, and floor wash water. Pollutants of concern include:
  - Total Suspended Solids
  - Biochemical Oxygen Demand
  - Oil
  - Grease
- Wastewater within the Recycling and Transfer building shall drain to floor drains connected to double contained drainpipes.

20

## OPERATIONS

---

### Wastewater Treatment

- Wastewater shall drain to a gravity oil-water separator for pre-treatment, including the transfer trailer parking area.
- The gravity oil-water separator shall:
  - Separate oil and grease
  - Allow solids to settle from the wastewater.
- The floor drains within the Recycling and Transfer Building shall also trap solids by setting the drainpipe inverts one foot above the base of the floor drain.
- The pre-treated wastewater shall then be discharged to a grinder pump and pumped via a force main to the existing sewer line along Dolsontown Road.

21

## OPERATIONS

---

### Stormwater Management

- Runoff from the site shall be collected by swales and catch basins.
- Trailer Parking Area separated from Stormwater System and covered with a canopy.
- Treatment and control features include:
  - Bio-Retention Basin
  - Two Wet Ponds –East and West
- Designed in accordance with the New York State Stormwater Management Design Manual.
- The stormwater collection system shall be monitored in accordance with the NYSDEC Multi-Sector General Permit for stormwater discharges from industrial facilities.

22

# OPERATIONS

## Bio-Retention Basin

- Bio-retention Basin is a green infrastructure technique.
- Provides run-off reduction through filtering stormwater through planting soil in a shallow depression.
- Mulched and planted with native vegetation to provide habitat.
- Treats runoff from the administration building and the employee parking lot.

23

# OPERATIONS

## Wet Ponds

- Designed to reduce post-development discharge rate to less than the pre-development discharge rate.
- Provides storage through a permanent pool and detention.
- Provides treatment through sedimentation and includes a forebay for pre-treatment.
- Seeded with native wetland vegetation to provide habitat.

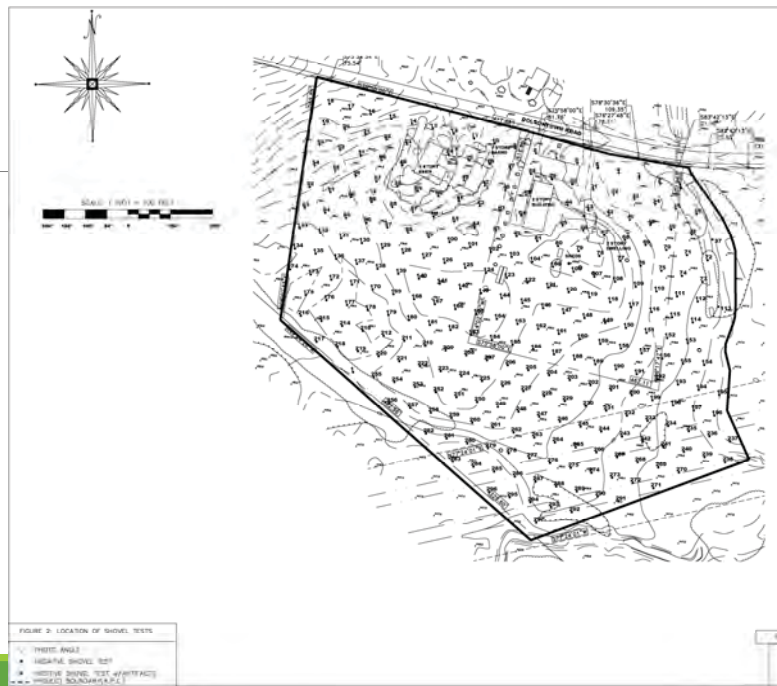

24

## ENVIRONMENTAL REVIEW

- Located in Archeologically Sensitive Area - Phase 1 Archeological Survey conducted.
- Investigation found no evidence of archaeological sites within the project's Area of Potential Effects
- New York State Historic Preservation Office (SHPO) recommended that the project will not adversely affect historic or archaeological properties listed or eligible for listing on the National Register of Historic Places.
- Human Remains Discovery Protocol shall be implemented should any evidence of human remains or possible burial goods be encountered during construction.

27

## PUBLIC COMMENTING

Project Application Documents can be viewed at:

Middletown Thrall Library  
11-19 Depot Street  
Middletown, New York.

Or Online at <https://DomMarTransferStation.ensolinc.com>

Can mail comments to: EnSol, Inc.  
661 Main Street  
Niagara Falls, NY 14301  
Attention: David Lenox

Email comments to: [Marangicomments@ensolinc.com](mailto:Marangicomments@ensolinc.com)

Comment period closes on November 18, 2022.

## ***Comment Summary List***

**Dom-Mar Recycling and Transfer Facility  
Public Participation Plan  
Public Comment Summary**

Meeting No. 1 November 1, 2022 6:00 PM		
Name	Phone Number	Comment
James A. Rollins	(845) 825-3417	In favor of the proposed project. Lives in Middletown NY, and not concerned about living near the proposed project location based on proposed facility operation. Local transfer stations do not have adequate capacity.
Katie McMammoth	(845)741-8379	In favor of the proposed project. Husband works for Marangi Waste. Company does a good job locally.
Meeting No. 2 November 7, 2022 1:00 PM		
Name	Phone Number	Comment
Gary	(570) 228-6884	In favor of the proposed project. Will increase local recycling capacity, recyclable materials are currently hauled to other Counties.
Molly Hamilton	(845) 343-5566	In favor of the proposed project.
Kenny Strauser	(845) 699-4752	In favor of the proposed project. Works for Marangi Waste, a family owned and family oriented company that works hard to keep the area clean and control litter.
Christian	(845) 527-3406	In favor of the proposed project. The project will be beneficial to the environment.
Jeff Less	(570) 609-7852	In favor of the proposed project.
Tom Hyland	(845) 779-7169	In favor of the proposed project.
Brendan Finnegan	(845) 645-8295	In favor of the proposed project. Can be beneficial to Orange County.
Vincent Manza	(570) 390-9485	In favor of the proposed project. Marangi Waste is well liked by their neighbors. Collection trucks are cleaned every day.
Steven	(845) 781-3786	In favor of the proposed project. The existing transfer stations are backed up creating long waits, providing another transfer station will ease wait times.
Jackie Gentile	(845) 721-0542	In favor of the proposed project. In favor of recycling. Works for Marangi Waste.
